MSM301 3-Circuit Add-On For MS301

Supplementary Instructions

The MSM301 connects to an MS301 via the 9-pin d-Sub connector and cable that is provided.

The connecting cable should not be extended, and the MSM301 should be located to accommodate that length.

Once connected, the D, E & F Circuits behave exactly as do A, B & C.

The link switch will connect Circuits D & E or all three.

If both the MS301 and the MSM301 link switches are in the ALL position, all six Circuits will be linked.

For all other functions, refer to the MS301 Instructions.
